SECURITY OPERATIONS DAY VIP ONE TO ONE
27th January 2020 - Hall 8.1

During a session there isn't always the time to go deeper in the details of a specific topic, neither an event with hundred participants is always the most comfortable situation to question about sensitive information related your own company. For that reason if you will participate at 27th January 2020 to Security Operations Day you could register to one of the five roundtables directly at the customer deck hosted in the room of the Security Operations Day in Hall 8 at room A-102.

The One to One meetings are intended to discuss in a one to one format about a specific topic. Together with the speaker you will talk about what that specific topic means for you and which are your own doubts or questions.

How to Register
The One to One meetings are open to the first ten attendees who will register on site at the customer desk hosted in the room of the Security Operation Day session in Hall 8 room A-102.
