

CISCO SECURE SECURITY OPERATIONS DAY
Monday, February 6, 2023

09:00 – 09:45 Registration

10:00 – 10:10 Welcome and Introduction

Speaker: Colin McMillan, Head of European Security Consulting, Cisco

10:10 – 10:40 A Glimpse of the Future Threat Landscape

Synopsis: The previous twelve months have seen many changes within the threat landscape. These changes provide us with a glimpse of the future, and the attacks that we can expect to see. In this presentation, Martin will review the cyber attacks associated with the conflict in Ukraine, and the nature of the threat actors involved. Martin will present how defenders have been successful in repelling attacks and discuss the implications for the future in cybersecurity.

Speaker: Martin Lee, EMEA Lead, Talos Strategic Planning & Communications

10:50 – 11:20 Software Transparency – Lifting the Lid and Exposing the Risks

Synopsis: Recent high-profile incidents have shone a spotlight on the inner elements of the software that we rely upon. Estimates suggest that modern software solutions contain more than 70% free or open-source components. The challenge facing the industry is understanding what these components are and the risk they might present to your organisation. During this session Mark will explore how achieving software transparency can help your organisation understand its exposure to hidden risk.

Speaker: Mark Jackson, National Cybersecurity Advisor, UK&I at Cisco

11:30 – 12:00 SecDevOps Automation – What can we really do with Automation?

Synopsis: Automation can enable teams to deliver greater value by eliminating manual efforts. If tasks can be handled automatically, that frees up teams to pursue more productive and innovative pursuits. This is vital at a time when secure software is essential for running a digital business. But what can be readily automated that removes the need for manual intervention. This session takes a look into some of those ideal use cases.

Speaker: Christopher Van der Made, Engineering Product Manager at Cisco

12:00 – 12:45 Lunch

13:00 -13:30 Future of Work - Beyond the Buzz Words

Synopsis: We work in a world full of buzz words, but also one full of innovation. The pandemic drove some rapid shifts in how we utilise technology for the "Hybrid" world in which we now work, but what's coming next? Join Josh and Rob for a discussion about what the future of work could really look like, where they'll step beyond the buzz words of today such as Passwordless, SASE and Zero Trust. They'll talk about what digital identity will look like, how it might change the way we think about authentication and how it might change our personal lives as well as our working lives. And they'll look at how we can utilise digital identity to support the hybrid work solutions of tomorrow, help deliver the consistency that leads to better user experiences, and ultimately helps organisations reduce their risk.

Speakers: Josh Green, Technical Marketing Engineer at Duo Security (Cisco) and Rob Lay, Leader, Systems Engineering, Cyber Security, Cisco

13:40 – 14:10 Lessons Learned from a Cyber incident against Cisco

Synopsis: Mike will go through the details of the recent cyber incident against Cisco, and speak to the actions taken in depth to detect and mitigate, as well as lessons learned to help prevent similar incidents from occurring in the future.

Speaker: Mike Scheck, Sr. Director of Security Visibility and Incident Command, Cisco

14:15 – 14:45 Securing the Edge and everything in-between

Synopsis: Join this exclusive session with our speakers as they discuss:

- The need for a different architecture to meet today's cloud proxy use cases
- The most efficient way to address the foundational capabilities of Security in the cloud era
- Maturity curve - how to extend from a foundational capability and beyond.

Speakers: Scott Manson, EMEA Leader Cloud Security, Cisco and Cisco customer guest speaker

15:00 – 16:45 Speed Dating /Networking Session

Informal session with beer and nibbles

- An ice breaker
- 2 - 3 topics of discussion around the room
- 30-minute slots, chance for everyone to speak about a specific topic, with the day's speakers
