Cisco Showcase, World of Solutions, Hall 1

CISCO Live !

 Cisco Spaces Wayfinding Kiosks

Welcome to the new Cisco Showcase

Explore 150+ innovative technologies, inspiring sessions, and immersive experiences, including the Security Operations Center. See how Cisco helps you build, scale, and protect your data centers, future-proof your workplaces, and ensure your organization's digital resilience. Discover the platform advantage that accelerates your success and helps you realize compounding value as products work seamlessly together across your IT landscape.

Cisco Showcase > AI-Ready Data Centers

Discover how Cisco helps organizations modernize and transform data centers to power traditional AI workloads anywhere. Learn about how Cisco unifies networking, compute, security, and observability to deliver AI-ready data centers. With Cisco, organizations can accelerate AI initiatives without compromise—maximizing agility while building digital resilience.

LOCATION	DEMO NAME	DESCRIPTION	PRODUCTS AND SERVICES
AIDC-01	Streamline firewall management: Cisco Hybrid Mesh Firewall Cisco Security Cloud Control	See how you can manage and deploy firewall policies from Cisco Security Cloud Control - L3/4 policies across Cisco and non-Cisco firewalls and L7 policies to find threats in encrypted traffic for consistent policy enforcement across your enterprise.	Cisco Hybrid Mesh Firewall, Cisco Security Cloud Control
AIDC-02	Achieve microsegmentation: Cisco Hybrid Mesh Firewall Cisco Secure Workload Isovalent	Segmentation that meets you where you are. Learn how Cisco Hybrid Mesh Firewall can help you on your segmentation journey by providing agentless and agent-based segmentation for your traditional and modern applications including Kubernetes, thereby minimizing attack surface and stopping unauthorized lateral movement.	Cisco Hybrid Mesh Firewall, Cisco Secure Workload, Isovalent
AIDC-03	Stop threats at first hop: Cisco Hybrid Mesh Firewall Cisco Hypershield Cisco Smart Switch	Integrate security directly into your network infrastructure with Hypershield and Smart Switch capabilities within Cisco Hybrid Mesh Firewall. Learn how this solution enables device consolidation through high-capacity L4 enforcement supplemented at the DC network fabric level, allowing for security enforcement and policy validation at every connection point without compromising performance.	Cisco Smart Switch, Cisco Hybrid Mesh Firewall, Live Protect
AIDC-04	Cisco Security and Observability: AI increases risk. We fuse Security and Observability into every layer.	Discover how Cisco makes AI secure by design. From data and networks to workloads and models, see how protection is embedded across the full AI stack.	

AIDC-05	Ensure workload exploit protection: Cisco Hybrid Mesh Firewall Cisco Hypershield	In today's AI-driven threat landscape, vulnerabilities are weaponized within hours, not weeks. Cisco Hypershield delivers automated distributed protection with CVE-shielding, enabling organizations to secure applications and workloads. In an era where threats emerge faster than ever, your teams can maintain business resilience and security without having to roll out software upgrades.	Cisco Hybrid Mesh Firewall, Cisco Hypershield
AIDC-06	Secure modern applications: Isovalent Tetragon	Protect Kubernetes workloads with advanced secure networking, runtime enforcement, and transparent encryption. Identify and mitigate security risks across network and runtime before they can execute, enforcing zero-trust principles across all infrastructures. By uniting observability, enforcement, and integration, Isovalent reduces attack surfaces, accelerates response times, and delivers protection for cloud-native environments.	Isovalent, Tetragon
AIDC-07	Protect AI applications: Cisco AI Defense	Building enterprise first-party AI applications exposes organizations to new security and safety risks. Cisco AI Defense delivers end-to-end protection, from supply chain risk management to runtime protection, across the entire AI lifecycle.	Cisco AI Defense
AIDC-08	Extend DC fabric to cloud: Kubernetes and Nexus Fabric	Implement multi-tenant distributed load-balancing and firewalling within Kubernetes running on-premises and learn how to integrate them with your Nexus Fabric using EVPN. The demo highlights Isovalent's support for Container and VM workloads connecting to the EVPN fabric in a seamless manner.	Cisco Nexus Fabric, Isovalent
AIDC-09	Unify infrastructure with HCI: Unify infrastructure with HCI	See how Cisco Compute Hyperconverged with Nutanix can accelerate AI and IT modernization initiatives from the data center to the edge.	Cisco Compute Hyperconverged with Nutanix
AIDC-10	Simplify infrastructure ops: Cisco Intersight	Discover the power of Cisco Intersight, a cloud-based IT operations platform that simplifies fleet management at scale through assisted operations. Leverage automation and insights to boost productivity, improve uptime, and accelerate time to value. Reduce security risks and drive innovation to deliver AI-ready infrastructure across data center and edge environments.	Cisco Intersight

AIDC-11	Services for AI-Ready Data Centers: Cisco Services as Code Cisco AI Defense	Cisco Services helps you build, modernize, and optimize AI-ready data centers to meet demanding compute, storage, and throughput needs. Benefit from expert-led and AI-powered Cisco services to deploy and manage infrastructure 5x faster and with 98%+ change success, while also protecting threats and impacts to your AI-ready data center. Double your success rates for DC changes with integrated and automated testing.	Services as Code (SaC), Cisco AI Assistant, Cisco ACI Fabrics
AIDC-12	Services for AI-Ready Data Centers: Cisco AI Pods Nexus Compute Networking	Cisco Services helps you build, modernize, and optimize AI-ready data centers to meet demanding compute, storage, and throughput needs. Benefit from expert guidance, automation, and proven methodologies to maximize existing investments or create new AI capabilities. With personalized, proactive, and predictive support, Cisco ensures reliable, secure, and resilient operations, maximizing uptime and minimizing risk for your AI workloads.	CX Test Manager (CXTM), Services as Code (SaC)
AIDC-13	Optimize AI performance: Splunk Observability Cloud	Proactively monitor your AI application stack, including agents, LLMs, and infrastructure. Track model performance, accuracy, and cost to ensure alignment with business goals. Optimize health, security, and costs across your entire AI environment with alerts on infrastructure bottlenecks and spikes.	Splunk Observability Cloud
AIDC-15	Simplify cloud-managed fabrics: Cisco Nexus Hyperfabric Full-stack AI	Explore Cisco Nexus Hyperfabric, the cloud-managed network fabric solution for data centers. Delivered as a service, it allows customers to effortlessly design, deploy, manage, and scale multiple fabrics worldwide with minimal expertise. Join us for a demo to experience its capabilities firsthand.	Cisco Nexus Hyperfabric
AIDC-16	Unified operations, one fabric: Cisco Nexus Dashboard Cisco Nexus One	Transform data center operations with Cisco Nexus Dashboard. Gain unified management, AI-powered insights, and automation across LAN, SAN, IPFM, and AI/ML fabrics to optimize performance, prevent outages, and enhance security. Streamline workflows, enforce policies consistently, and achieve smarter, more efficient network management across VXLAN-EVPN and Cisco ACI fabrics.	Cisco Nexus Dashboard, Cisco ACI Fabrics, NX-OS, Cisco Nexus 9000 Series Switches

AIDC-17	Accelerate AI deployments: Secure AI Factory with NVIDIA Cisco AI PODs	Experience Cisco Secure AI Factory with NVIDIA—an integrated, secure AI infrastructure and software solution. Featuring Cisco AI PODs, the demo showcases simplified deployment, scalable performance, and accelerated AI/GenAI pipelines. Discover how our modular, industry-tailored approach empowers innovation and delivers measurable outcomes for your business.	Cisco Secure AI Factory, Cisco AI PODs
AIDC-18	Power AI workloads at the edge: Cisco Unified Edge	The first systems approach for distributed computing brings infrastructure to the data, enabling real-time inferencing and agentic workflows from edge to core.	Cisco Unified Edge
AIDC-19 and AIDC-20	Built for today. Ready for what's next: Power of the platform Flexibility of an open ecosystem	See how Cisco helps customers grow from edge use cases to data center scale across teams and locations, with compute, networking, and security working together and observability keeping everything clear and controlled.	
AIDC-21	Build end-to-end AI networks: NX-OS SONiC NVIDIA Spectrum ASIC AI jobs	Discover how Cisco N9100, powered by NVIDIA Spectrum Silicon, supports both front-end and back-end data center architectures. With built-in agentic ops—AI-driven networking intelligence—the platform streamlines the deployment, orchestration, and management of AI workloads. Intelligent packet flow, adaptive routing, and real-time telemetry work together to proactively monitor AI jobs, maximize GPU usage, and ensure consistent, high performance across all workloads. Choose NX-OS or SONiC for flexibility.	Cisco N9100 Series Switches, Cisco Nexus Dashboard, NVIDIA Spectrum-X Ethernet Switch Silicon
AIDC-23	Cisco UCS Cisco Unified Edge: AI needs scale. We go beyond servers, delivering complete systems.	The Secure AI Factory shows how Cisco delivers AI-ready infrastructure with security built in by design. Experience how customers deploy, operate, and scale AI with confidence across compute, networking, and workloads.	Cisco UCS, Cisco Unified Edge
AIDC-24	Increase data center performance and efficiency: Cisco Silicon One 400G BiDi Linear Pluggable Optics	Increase data center network performance and efficiency with: Cisco Silicon One, the industry's only scalable and programmable unified silicon architecture, Cisco 400G BiDi the industry's only duplex MMF optic, and Cisco integrated designs for Linear Pluggable Optics (LPO) solutions.	Cisco Silicon One G200, Cisco Silicon One E100, Cisco Silicon One P200, Cisco QSFP-DD 400G BiDi, Cisco OSFP L800G, Cisco N9364E-SG2-X

AIDC-25	Achieve energy savings: Direct liquid cooling	Cisco's 51.2T switch with Direct Liquid Cooling solution uses liquid cooling to cool up to 80% of the components in the system. Future-proof design supports up to 40W of optics, comes in a compact 2RU (rack units) platform, and delivers 12%+ system power savings versus an air-cooled solution.	Cisco 51.2T Switch
AIDC-26	Power AI with immersion cooling: Unified compute at the edge	Immersion cooling is transforming edge computing by providing a resilient alternative where air cooling proves inadequate, offering significant space savings and reliable performance in demanding environments. Its energy-efficient design minimizes power and water demands, enhancing sustainability, while the compact footprint maximizes valuable real estate for increased compute density in space-constrained edge environments.	Cisco Unified Edge

Cisco Showcase > AI and Lightning Theaters

Join Cisco experts for 30-minute sessions focused on Cisco's holistic AI strategy and 15-minute deep-dive sessions into product features and announcements connected to the Cisco Showcase demos.

AI Theater sessions are recorded and available on demand.

Cisco Showcase > Cisco Customer Experience

Cisco is revolutionizing how technology is deployed, adopted, and operated to drive greater resiliency, simplicity, and faster time-to-value. With the new CX, we're blending the power of agentic AI with the brilliance of our experts to make every interaction personalized, proactive, and predictive. Our goal is simple: to make you feel like you're our only customer.

LOCATION	DEMO NAME	DESCRIPTION	PRODUCTS AND SERVICES
CX-01	AI adoption framework: Design Build Adopt	Discover methodologies, best practices, and AI use cases tailored to your industry and infrastructure needs. Get guidance for both IT and LOB teams to unlock and maximize AI's value and drive transformative outcomes.	AS-T, Lifecycle Services (LCS), Success Tracks, TAC, Expert Care
CX-02	Customer success: Empower Accelerate Optimize	Looking to get more from your technology investments? Explore how Cisco Customer Success leverages value-boosting automation and personalized recommendations to help you realize value faster by using more technology features to simplify operations, improve performance, and achieve your business outcomes.	Cisco Lifecycle Services

CX-03	Professional services: Resilient Simple Accelerated	Efficiently optimize your IT environment through expert advice to accelerate deployment and time to value. Explore how Cisco Services can maximize your IT investments with outcome focused engagements based on data-driven insights and leveraging capabilities such as crash risk mitigation, and configuration best practices to achieve streamlined operations, reliability, and optimal device capacity.	Professional Services
CX-04	Modern AI-powered support: Personalized Proactive Predictive	Experience a new era of IT support with AI-driven automation and intelligence. Learn how modern AI-powered support enables reliable, resilient, and secure operations that maximizes uptime and minimizes risk. Our approach moves beyond reactive fixes, delivering a personalized, proactive, and predictive support experience that is essential for the AI era.	Webex Assistant
CX-05	Cisco IQ: The AI engine for next-gen services	Experience how Cisco IQ transforms IT support and lifecycle management through AI-powered, proactive, and predictive insights. Cisco IQ unifies your IT asset visibility, digitizes insights, and automates key processes to eliminate fragmented, manual workflows. This self-service demo showcases how Cisco IQ enables AI-powered intelligence with proactive risk assessments, device lifecycle management, and other operational tasks for your technology infrastructure.	Cisco IQ

Cisco Showcase > Cisco IT

Come meet Cisco IT engineers and get an inside look at the latest infrastructure and AI initiatives, operations, and automation that connect and protect Cisco.

LOCATION	DEMO NAME	DESCRIPTION	PRODUCTS AND SERVICES
DR-11	Drive digital resilience: Cisco IT: NetOps, AI, and zero trust in practice	Explore Cisco IT's journey to digital resilience. Witness our real-world strategies for revolutionizing network operations with automation, AI, and comprehensive observability using Splunk and Cisco ThousandEyes. Plus, learn how we deployed a robust Zero Trust Architecture across our enterprise, securing identity and access.	Splunk, Cisco Catalyst Center, Cisco Catalyst SD-WAN, Cisco ThousandEyes

DR-12	Fuel smart workplaces: Cisco IT: Smart workplaces journey and support	See how Cisco IT built and maintains its smart buildings. Discover our real-life journey integrating network, IoT, and collaboration for enhanced efficiency. Learn how we use Cisco Catalyst Center, Cisco Spaces, and Splunk for comprehensive monitoring and support, ensuring a future-proof workspace experience at scale.	Webex Cloud Suite, Cisco Spaces, Webex Devices, Cisco Catalyst Center, Splunk
DR-13	Deliver AI-ready data centers: Cisco IT: Ethernet fabrics for AI clusters in action	Discover how Cisco IT built an ultra-high performance, scalable, and non-blocking Ethernet fabric for AI clusters. This Cisco-on-Cisco story showcases best practices, the technology stack (Silicon One, Nexus), key configurations, and challenges faced in delivering a 256 GPU compute form for demanding AI workloads.	Optical, SONiC, Nexus, Hyperfabric

Cisco Showcase > Cisco Platform Advantage

Accelerate your success with Cisco's Platform Advantage, designed to help you realize compounding value as products work seamlessly together. Explore real-world scenarios and see how you can maximize your technology investment across your entire IT landscape.

LOCATION	DEMO NAME	DESCRIPTION	PRODUCTS AND SERVICES
CPA-01	Unify machine data anywhere: Cisco Data Fabric and Splunk	Cisco Data Fabric, powered by Splunk, unifies and analyzes data across edge, cloud, and hybrid environments, enabling real-time, AI-driven insights and faster decision-making without moving data into Splunk. It accelerates AI model development by harnessing machine data for advanced, cross-domain business intelligence.	Cisco Data Fabric, Splunk Platform
CPA-02	Explore emerging technologies: Internet of Agents and Quantum Networking	Want to see how the Internet of Agents (IoA) and Quantum Networking are shifting the vision for emerging tech? Visit the Outshift by Cisco demo station to learn about our advancements in Quantum Networking and see how IoA, an open, interoperable internet for agent-to-agent collaboration is accelerating how work gets done.	Internet of Agents (IoA), Quantum Networking

CPA-03	Radically reduce MTTR: AgenticOps AI across Networking and Collaboration	See how Cisco AI Assistant helps you monitor, troubleshoot, and automate operations across Cisco architecture. Plus, accelerate insights and automate troubleshooting workflows with Intelligent Packet Capture and AI Packet Analyzer. From pinpointing issues impacting a Webex meeting to identifying root causes, you can deliver exceptional user experiences across domains.	Cisco Meraki dashboard, Cisco Catalyst Center, Cisco AI Assistant, AI Packet Analyzer, Intelligent Packet Capture, Webex AI Agents, Webex Control Hub
CPA-04	Secure and scale AI outcomes: Cisco Secure AI Factory with NVIDIA	As AI expands from a single cluster to distributed environments, security and operations must scale with it. This demo shows how Cisco delivers end-to-end security and observability for AI—from infrastructure to Kubernetes to models and apps—using AI Defense, Isovalent, Splunk dashboards for AI, and Security Cloud Control to provide unified visibility, governance, and protection for critical AI infrastructure.	Cisco Secure AI Factory with NVIDIA
CPA-05	Innovate with AI Networking: Cisco Silicon One	Cisco Silicon One is transforming the industry by enabling rapid large-scale AI/ML buildouts that previous networks couldn't support. It powers both Cisco and third-party systems, delivering breakthrough innovation and best-in-class features to enhance these networks. The technology efficiently processes workloads, supports scalable clusters, enables sustainable data centers, and offers advanced capabilities for managing and securing these environments. Discover how Cisco Silicon One, in conjunction with Cisco Optics and systems, is reshaping network infrastructure to meet the demands of AI/ML centers with exceptional efficiency and scalability.	Cisco Silicon One, Cisco Optics
CPA-06	Automate configuration with AI: Agentic workflows Networking Collaboration	See how Agentic Workflows and Cisco AI Assistant transform how you manage networks. Automating configuration across sites and switches cuts time and errors without sacrificing control. Deploy a new site with full stack in minutes, securing and bringing networks and collaboration devices online faster from one cloud interface." Plus, use Cloud CLI and verify all the configurations are what you need.	Cisco Meraki dashboard, Agentic Workflows, Cisco AI Assistant, Cisco Catalyst 9000 Series Switches, Cloud CLI

CPA-07	Secure your enterprise in the agentic AI era: End-to-end security with identity-driven controls	AI is rapidly transforming both the threat landscape and enterprise operations. Discover how Cisco’s identity-first security meets the AI era. Explore real-world use cases: zero trust segmentation, access for humans, machines, and AI agents, plus identity threat detection and response—empowering security teams to secure innovation in an evolving threat landscape.	Cisco Duo, Cisco Identity Intelligence, Cisco Secure Access, SD-WAN, ISE, Cisco XDR, User Protection Suites, Breach Protection Suite
CPA-08	Faster resolution with AgenticOps: Cisco AI Canvas	Learn about Cisco AI Canvas, a cross-domain, multiplayer, generative UI shared workspace that reinvents how IT teams work and win together.	Cisco AI Canvas
CPA-09	Command from one control panel: Cisco Cloud Control	Cisco Cloud Control is Cisco's single unified management platform for the AI era—delivering Unified Control, Intelligent Fabric, and Agentic Operations across networks, security, compute, data, models, and agents.	Cisco Cloud Control
CPA-10	Optimize identity-driven segmentation: ISE TrustSec	Experience how you can enforce identity-based segmentation using “Who,” “What,” and “Where”—linking network access to user and device identities, not just location. Dynamically manage segmentation policies across Cisco solutions, ensuring secure, consistent access control and improved visibility in branch offices, campus environments, and data centers.	ISE, TrustSec
CPA-11	Assure every digital experience: Cisco ThousandEyes Networking Cisco AI Assistant	Get deep visibility across every network (owned or unowned) with Cisco ThousandEyes built into the Cisco Meraki dashboard and Catalyst Center. See how the AI Assistant streamlines troubleshooting and surfaces device health insights - from org-wide views down to the individual device, for faster, smarter assurance across your entire network.	Cisco ThousandEyes, Cisco Meraki Dashboard, Cisco Catalyst Center, Cisco AI Assistant

Cisco Showcase > Cisco Security

Cisco shines when security meets the network. Learn why Cisco and Splunk are innovating to deliver security solutions that drive digital resilience for your organization. Understand our approach for leveraging AI to power your defenses for transformational cloud protection, user protection, and security analytics and response. Follow the blue carpet in the Showcase to locate the Cisco Security demos and check out additional security solutions in Cisco Platform Advantage.

LOCATION	DEMO NAME	DESCRIPTION	PRODUCTS AND SERVICES
AIDC-01	Streamline firewall management: Cisco Hybrid Mesh Firewall Cisco Security Cloud Control	See how you can manage and deploy firewall policies from Cisco Security Cloud Control - L3/4 policies across Cisco and non-Cisco firewalls and L7 policies to find threats in encrypted traffic for consistent policy enforcement across your enterprise.	Cisco Hybrid Mesh Firewall, Cisco Security Cloud Control
AIDC-02	Achieve microsegmentation: Cisco Hybrid Mesh Firewall Cisco Secure Workload Isovalent	Segmentation that meets you where you are. Learn how Cisco Hybrid Mesh Firewall can help you on your segmentation journey by providing agentless and agent-based segmentation for your traditional and modern applications including Kubernetes, thereby minimizing attack surface and stopping unauthorized lateral movement.	Cisco Hybrid Mesh Firewall, Cisco Secure Workload, Isovalent
AIDC-03	Stop threats at first hop: Cisco Hybrid Mesh Firewall Cisco Hypershield Cisco Smart Switch	Integrate security directly into your network infrastructure with Hypershield and Smart Switch capabilities within Cisco Hybrid Mesh Firewall. Learn how this solution enables device consolidation through high-capacity L4 enforcement supplemented at the DC network fabric level,	Cisco Smart Switch, Cisco Hybrid Mesh Firewall, Live Protect

		allowing for security enforcement and policy validation at every connection point without compromising performance.	
AIDC-04	Cisco Security and Observability: AI increases risk. We fuse Security and Observability into every layer.	Discover how Cisco makes AI secure by design. From data and networks to workloads and models, see how protection is embedded across the full AI stack.	
AIDC-05	Ensure workload exploit protection: Cisco Hybrid Mesh Firewall Cisco Hypershield	In today's AI-driven threat landscape, vulnerabilities are weaponized within hours, not weeks. Cisco Hypershield delivers automated distributed protection with CVE-shielding, enabling organizations to secure applications and workloads. In an era where threats emerge faster than ever, your teams can maintain business resilience and security without having to roll out software upgrades.	Cisco Hybrid Mesh Firewall, Cisco Hypershield
AIDC-06	Secure modern applications: Isovalent Tetragon	Protect Kubernetes workloads with advanced secure networking, runtime enforcement, and transparent encryption. Identify and mitigate security risks across network and runtime before they can execute, enforcing zero-trust principles across all infrastructures. By	Isovalent, Tetragon

		uniting observability, enforcement, and integration, Isovalent reduces attack surfaces, accelerates response times, and delivers protection for cloud-native environments.	
AIDC-07	Protect AI applications: Cisco AI Defense	Building enterprise first-party AI applications exposes organizations to new security and safety risks. Cisco AI Defense delivers end-to-end protection, from supply chain risk management to runtime protection, across the entire AI lifecycle.	Cisco AI Defense
AIDC-08	Extend DC fabric to cloud: Kubernetes and Nexus Fabric	Implement multi-tenant distributed load-balancing and firewalling within Kubernetes running on-premises and learn how to integrate them with your Nexus Fabric using EVPN. The demo highlights Isovalent's support for Container and VM workloads connecting to the EVPN fabric in a seamless manner.	Cisco Nexus Fabric, Isovalent
DR-18	Instant attack verification: Cisco XDR	Explore how Cisco XDR fights modern AI-powered attacks with Instant Attack Verification. Powered by Agentic AI, it automatically validates threats, builds tailored investigation plans, and launches rapid,	Cisco XDR

		decisive responses that enable security teams to stop sophisticated attacks at AI speed before they cause major damage.	
DR-19	Simplify security operations: Cisco XDR Cisco Meraki MX	Discover how the Cisco XDR incidents view in the Meraki dashboard simplifies network security operations, providing a seamless user experience that improves threat detection and incident response. Experience the unified visibility and enhanced threat detection of the Cisco XDR integration with Meraki MX offers to security and network defenders.	Cisco XDR, Cisco Meraki MX
DR-20	Services for security: Understand your risk and secure your assets	Cisco Services deliver digital resilience by providing you with comprehensive and holistic visibility of your assets and corresponding risks. Benefit from personalized and predictive AI insights and experience how an intelligence-driven approach transforms reactive support into proactive customer success.	Cisco XDR
FPW-30	Manage and secure AI traffic: Cisco Secure Access Cisco SD-WAN	Discover how Cisco SASE enables organizations to embrace AI for their workforce. AI traffic puts demand on WAN networks for high performance, low	Cisco Secure Access, Cisco SD-WAN

		latency connections to remote processing. AI traffic needs to be identified and prioritized to ensure this new type of traffic is delivered to meet business needs.	
FPW-31	Secure agentic AI: Cisco Secure Access	Explore how Agentic AI is reshaping enterprise security. Learn how Cisco is powering new visibility, identity, and access controls to safely enable autonomous AI systems built for zero trust security.	Cisco Firewall, Cisco Duo, Cisco Secure Access
FPW-32	Outsmart identity attacks: Cisco Duo Cisco Identity Intelligence	Identity is the new security perimeter and foundation of Zero Trust yet remains the cause of most breaches. Come learn how Cisco's security-first IAM solution fortifies against identity-based attacks with end-to-end phishing resistance and simultaneously enriches the security portfolio using Cisco Identity Intelligence risk insights to deliver continuous identity visibility, security and dynamic access policies.	Cisco Duo, Cisco Identity Intelligence
FPW-33	Secure access to GenAI apps: Cisco Secure Access	Learn how to implement safe and secure access to GenAI apps with our automated guardrails policy engine. Also, with the newly launched AI Supply Chain Risk Management capability, learn	Cisco Secure Access

		how we can allow for safe development of AI applications.	
--	--	---	--

Cisco Showcase > Digital Resilience

Discover how Cisco keeps your organization securely up and running in the face of any disruption. Learn how Cisco provides visibility and insights across the entire digital footprint, uniquely combining the power of the network with security, observability, and assurance.

LOCATION	DEMO NAME	DESCRIPTION	PRODUCTS AND SERVICES
DR-01	Services for observability: Cisco ThousandEyes Splunk AppDynamics	Cisco Services deliver digital resilience through Splunk, AppDynamics, and ThousandEyes to keep your organization securely up and running in the face of any disruption, by providing you the expertise to deploy with speed and confidence, mitigate threats proactively, and minimize disruptions with hyper-fast remediation through modern AI-powered support.	Cisco ThousandEyes, Splunk AppDynamics
DR-02	Resolve issues faster with agentic AI: Splunk MCP Splunk Cloud Observability Cloud	Use agentic AI to resolve issues fast. Build agentic AI with Splunk MCP across SecOps, ITOps, Engineering, and NetOps domains. Learn how AI agents and assistants help teams troubleshoot and reduce MTTR through AI-driven root cause, automated workflows, and human-verified remediation plans.	Cisco AI Canvas, Splunk Cloud Platform, Splunk Observability Cloud
DR-03	Explore unified observability: Splunk Observability	Discover how Splunk unifies APM, Infrastructure Monitoring, Digital Experience Monitoring, and Event Intelligence. See the business impact of every performance problem and every step end-users are taking across N-tier and microservices applications.	Splunk ITS, Splunk Observability Cloud, Splunk AppDynamics
DR-04	Accelerate app and network insights: Splunk Observability and Cisco Networking	See how Splunk's out-of-the-box network event correlation integrates data from Cisco ThousandEyes, Catalyst Center, and Meraki to give you cross-domain visibility, correlation, and noise reduction across owned and unowned networks, infrastructure, and applications.	Splunk Observability, Cisco Networking, Cisco ThousandEyes, Cisco Catalyst Center, Cisco Meraki
DR-05	Automate asset and attack analytics: Splunk Asset and Risk Intelligence Attack Analyzer	Learn how to gain continuous asset discovery and compliance monitoring with comprehensive asset inventories. See how automated threat analysis of suspected malware and credential phishing threats can help analysts quickly understand active threats.	Splunk Enterprise Security

DR-06	Drive real-time data insights: Cisco Data Fabric and Splunk	Learn about the next-gen Splunk platform where AI/agent AI is embedded throughout the entire data lifecycle to drive efficiency, faster TTV, and ease of use for analysts, admins, and AI developers.	Splunk Platform
DR-07	Assure reliable wireless experiences: Cisco ThousandEyes	Explore new Wi-Fi Assurance capabilities to surface key wireless events, for faster, more targeted, troubleshooting.	Cisco ThousandEyes
DR-08	Assure enterprise network uptime: Cisco ThousandEyes	Discover SD-WAN Assurance capabilities including AI/ML driven predictions and agentic workflows to identify and resolve network issues faster.	Cisco ThousandEyes
DR-09	Power network assurance with AI: Cisco AI Assistant	Explore the new Cisco AI Assistant for Assurance, featuring event summarization, dashboards, and AI Canvas. Use natural language to monitor, troubleshoot, and resolve user experience issues faster and more intuitively than ever.	Cisco ThousandEyes
DR-10	Unify network and app insights: Cisco ThousandEyes Splunk Observability	See how Cisco ThousandEyes and Splunk work better together, combining bi-directional AIOps assurance with ITSI. Launch into broader cross-domain themes with unified insights across network and application performance.	Cisco ThousandEyes
DR-11	Drive digital resilience: Cisco IT: NetOps, AI, and zero trust in practice	Explore Cisco IT's journey to digital resilience. Witness our real-world strategies for revolutionizing network operations with automation, AI, and comprehensive observability using Splunk and Cisco ThousandEyes. Plus, learn how we deployed a robust Zero Trust Architecture across our enterprise, securing identity and access.	Splunk, Cisco Catalyst Center, Cisco Catalyst SD-WAN, Cisco ThousandEyes
DR-12	Fuel smart workplaces: Cisco IT: Smart workplaces journey and support	See how Cisco IT built and maintains its smart buildings. Discover our real-life journey integrating network, IoT, and collaboration for enhanced efficiency. Learn how we use Cisco Catalyst Center, Cisco Spaces, and Splunk for comprehensive monitoring and support, ensuring a future-proof workspace experience at scale.	Webex Cloud Suite, Cisco Spaces, Webex Devices, Cisco Catalyst Center, Splunk
DR-13	Deliver AI-ready data centers: Cisco IT: Ethernet fabrics for AI clusters in action	Discover how Cisco IT built an ultra-high performance, scalable, and non-blocking Ethernet fabric for AI clusters. This Cisco-on-Cisco story showcases best practices, the technology stack (Silicon One, Nexus), key configurations, and challenges faced in delivering a 256 GPU compute form for demanding AI workloads.	Optical, SONiC, Nexus, Hyperfabric

DR-14	Assure every digital experience: Cisco ThousandEyes	Explore Cisco ThousandEyes in action with end-to-end visibility across owned and unowned networks, guided by the Cisco AI Assistant. Get assurance for mobile, Azure, and IIoT, plus integrations with Cisco Security and Observability. Finish with network assurance and drill into device health—from a global view to individual endpoints.	Cisco ThousandEyes
DR-15	Assure cloud and SaaS: Cisco ThousandEyes	Experience ThousandEyes Cloud Insights for AI-powered visibility across AWS and Azure. See how it connects to broader cross-domain assurance themes, including AI-ready data center assurance and end-to-end observability.	Cisco ThousandEyes
DR-16	Unify and automate SecOps: Splunk Enterprise Security	Experience how Splunk Enterprise Security surfaces lateral movement detections from tools like Cisco XDR. See how Splunk Enterprise Security automates responses using SOAR across both your Cisco and non-Cisco security tools (Endpoint, Firewall, Identity).	Splunk Enterprise Security, SOAR, Asset and Risk Intelligence (ARI), Splunk Attack Analyzer (SAA), Splunk Observability Cloud, Splunk ITSI, Splunk AI, Splunk Platform
DR-17	Accelerate SecOps with AI: Splunk Enterprise Security	See the Triage Agent, Malware Reversing Agent, AI Assistant in Enterprise Security, and AI Playbook Authoring in action. Learn how you can use Splunk AI agents to accelerate security operations with data from Cisco tools to provide robust security for your organization.	Splunk Enterprise Security, SOAR, Asset and Risk Intelligence (ARI), Splunk Attack Analyzer (SAA), Splunk Observability Cloud, Splunk ITSI, Splunk AI, Splunk Platform
DR-18	Instant attack verification: Cisco XDR	Explore how Cisco XDR fights modern AI-powered attacks with Instant Attack Verification. Powered by Agentic AI, it automatically validates threats, builds tailored investigation plans, and launches rapid, decisive responses that enable security teams to stop sophisticated attacks at AI speed before they cause major damage.	Cisco XDR
DR-19	Simplify security operations: Cisco XDR Cisco Meraki MX	Discover how the Cisco XDR incidents view in the Meraki dashboard simplifies network security operations, providing a seamless user experience that improves threat detection and incident response. Experience the unified visibility and enhanced threat detection of the Cisco XDR integration with Meraki MX offers to security and network defenders.	Cisco XDR, Cisco Meraki MX
DR-20	Services for security: Understand your risk and secure your assets	Cisco Services deliver digital resilience by providing you with comprehensive and holistic visibility of your assets and corresponding risks. Benefit from personalized and predictive AI insights and experience how an intelligence-driven	Cisco XDR

		approach transforms reactive support into proactive customer success.	
DR-21	Visualize your data with Splunk	Discover how Splunk dashboards help you visualize, monitor, and analyze your data in real time. Explore a range of interactive dashboards that turn complex data into clear, actionable insights-empowering better decisions and enhanced visibility across your organization. See the power of data visualization with Splunk at Cisco Live!	Splunk Enterprise Security, SOAR, Asset and Risk Intelligence (ARI), Splunk Attack Analyzer (SAA), Splunk Observability Cloud, Splunk ITSI, Splunk AI, Splunk Platform

Cisco Showcase > Future-Proofed Workplaces

Discover how Cisco helps organizations build modern workplaces that deliver exceptional experiences for employees, customers, and IT. Learn about how Cisco uniquely unifies networking, security, collaboration, and observability to power future-proofed workplaces.

LOCATION	DEMO NAME	DESCRIPTION	PRODUCTS AND SERVICES
FPW-01	Elevate calling experiences: CUCM Webex Calling Hybrid	Connect effortlessly in the office or on the go with Cisco Calling for secure, reliable communication. Discover how AI Receptionist and Customer Assist keep workflows smooth, and customers engaged from any location, on premises, in the cloud, or anywhere in between.	Webex Calling
FPW-02	Supercharge collaboration with AI: Webex Suite Cisco AI Assistant	The AI Assistant for Webex Suite brings a new generation of AI agents that work behind the scenes across Meetings, Calling, Messaging and more — from notetaking and receptionist support to task automation and live polling. These agents keep teams productive and connected, executing actions from meetings, suggesting polling questions based on conversations, and handling routine call inquiries.	Webex Suite, Cisco AI Assistant
FPW-04	Explore the AI ecosystem: Webex Suite Workflows and integrations	In today's world of many AI Agents, the AI Assistant is going above the Webex Ecosystem and orchestrates action across other ecosystems and applications such as Glean, Amazon Q index, Copilot, Jira, Salesforce, and more, reducing context switching and surfacing intelligence everywhere you work.	Webex Suite, Cisco Webex Assistant, Webex Contact Center
FPW-06	Join any meeting: Cisco Room Bar Pro	Choose your meeting experience. Join any platform—Microsoft Teams, Google Meet, or Zoom—with one touch on Cisco devices powered by NVIDIA or enjoy a native Microsoft Teams Rooms experience certified under the Microsoft Device Ecosystem Platform (MDEP). Unlock industry-leading AI features like intelligent	Cisco Room Bar Pro, Cisco Room Bar, Cisco Room Navigator for Table, Cisco Room Navigator for Wall, Microsoft Teams Rooms Meetings

		framing and noise removal for seamless, future-ready collaboration.	
FPW-07	Drive industry impact: Cisco Industry Portfolio Explorer	Demonstration will feature Cisco's Industry Portfolio Explorer on a screen including a FPW filter highlighting the use cases aligned to FPW. Staffed by the Industries Marketing team, all eleven industries will be featured on the demo screen.	Splunk, Cisco ThousandEyes, Cisco Smart Cameras, IIoT, Webex, Cisco Spaces, SD-WAN, Cisco Duo, Cisco AI PODs
FPW-08	Secure hybrid and remote work: SD-WAN Teleworker SASE	Experience how the 8100 MX, Meraki Access Point, SD-WAN, and Secure Access solutions—managed seamlessly with Desk Pro—can transform your home network into a secure, collaborative workspace. This interactive demo highlights how Cisco technologies protect your connectivity, optimize network performance, and ensure secure remote access, all from a single, intuitive platform. Visit us in the Cisco Live EMEA World of Solutions Demo area to see how you can easily secure and manage your home environment for work, learning, and collaboration.	8100 MX, Meraki Access Point, SD-WAN, Cisco Secure Access
FPW-09	Power the AI-ready campus: Cisco Smart Switches Secure networking	See our new smart switches in action! The Cisco C9350 and C9610 series smart switches power AI-driven campus and branch networks by providing scalable connectivity, multi-layered security with quantum-resistant encryption, unified management across on-premises and cloud, and operational agility through AI telemetry and automation.	Cisco C9000 Smart Switches, Cisco C9350, Cisco C9610
FPW-10	Build secure campus networks: Post-quantum cryptography Scalable network fabric	Connectivity requirements are exploding, with countless devices, agents, and workloads at the edge. The attack surface is expanding just as quickly, with attacks on data and network devices. Meanwhile, IT teams are overwhelmed, unable to keep pace with the sprawl of infrastructure and the rise of AI-powered security threats. See how a new AI-ready architecture for the campus can help you scale, secure, and adapt your network for the AI era.	Cisco Catalyst 9000, Meraki MS, Cisco Access Manager, Cisco Identity Services Engine, Cisco Software-Defined Access, Cisco Cloud-Managed Fabric, Adaptive Policy
FPW-11	Design the perfect workspaces: Workspace Designer	Simplify meeting room design and accelerate video deployment with the Cisco Workspace Designer. Choose a template, then customize it to fit your needs. Get hints and tips that help you choose the right equipment and deliver the best experience. Get blueprints and installation guides to share with your colleagues and stakeholders.	Cisco Workspace Designer, Cisco Board Pro G2
FPW-13	Unified network management: Meraki dashboard Catalyst Center Cloud-	Get hands-on with the only networking platform that offers a unified, AI-native platform, designed to work seamlessly in the cloud, on-premises, or in hybrid	Meraki dashboard, Cisco Catalyst Center, Global Overview, Cisco Catalyst Center Global Manager, Cisco Cloud-Managed Fabric

	managed fabric Global Overview Catalyst Center Global Manager	networks. See how the Meraki dashboard and Catalyst Center simplify, secure, and assure every connection for campus and branch. Organizations building their network experiences on Cisco can not only maximize the value of their current networking investments but will smoothly transition their organizations into the era of AI without risking downtime or security gaps.	
FPW-14	Explore future-proofed wireless: Wi-Fi 7 Wireless assurance URWB	Experience Cisco’s wireless innovation in action. Stop by this demo for a deep dive into how we’re combining cloud management, more flexible architectures, and AI-powered assurance to scale wireless connectivity to campuses of every shape and size.	CW9171 Wi-Fi APs (CW9171I), CW9174 Wi-Fi APs (CW9174I)
FPW-15	Scalable AI-ready devices: Routing Switching Wireless Rugged enterprise Cameras and sensors Collaboration	See our next generation hardware built for the AI era. Designed to deliver high-performance security across the branch, campus, and ruggedized environments.	CW9178 Wi-Fi APs (9178I), CW9171I, CW9174I, Campus Gateway (CW9800H1-MCG), CW9179 Wi-Fi APs (CW9179F), CW9178 Wi-Fi APs (CW9178I), CW9176 Wi-Fi APs (CW9176D1), CW9172 Wi-Fi APs (CW9172I), CW9172H Wi-Fi APs (CW9172H), CW9171 Wi-Fi APs (CW9171I), CW9174 Wi-Fi APs (CW9174I), CW9174 Wi-Fi APs (CW9174E), Campus Gateway (CW9800L-MCG)
FPW-16	AgenticOps Experience Center	The one-to-many demo stage lets us bring the full AgenticOps story to life—showing how AI, workflows, and domain intelligence connect as one system to reshape the NetOps experience. With fast-paced demos every 15 minutes, from immersive “day in the life” moments to interactive experiences, we turn learning into energy: high-value, high-traffic, and high-impact.	Cisco AI Canvas, Cisco AI Assistant, Agentic Workflows, Application Experience Troubleshooting, AI-RRM, Intelligent Group-Based Policy and Segmentation, AI Packet Capture Analysis
FPW-17	AgenticOps: agents in action: Simplify operations for networking Cisco AI Canvas Cisco AI Assistant Agentic workflows	The AgenticOps Playground gives customers a clear, unified view of how Cisco is transforming NetOps across the entire workplace stack—from intelligent wireless and visibility analytics to predictive control-plane insights and agentic operations with AI Assistant, Workflows, and AI Canvas. It demonstrates, in one place, how Cisco uses AI to simplify operations, reduce risk, and deliver a more autonomous, efficient, and resilient workplace.	Cisco AI Canvas, Cisco AI Assistant, Agentic Workflows
FPW-18	AgenticOps: agents in action: Simplify	Webex Control Hub simplifies IT manageability in workplaces by providing	Webex Control Hub, Cisco AI Canvas

	collaboration management Webex Control Hub Cisco AI Canvas	real insights and centralized control. It enables seamless management of devices, users, and services to optimize workplace efficiency, enhance employee experiences, and streamline IT operations.	
FPW-19	Assure every experience: Cisco ThousandEyes AI-powered assurance	Get hands-on with the only networking platform that offers a unified, AI-native platform, designed to work seamlessly in the cloud, on-premises, or in hybrid networks. See how Cisco's unified network management platform simplifies, secures, and assures every connection for campus and branch. Organizations building their network experiences on Cisco can not only maximize the value of their current networking investments but will smoothly transition their organizations into the era of AI without risking downtime or security gaps.	Cisco ThousandEyes
FPW-20	Simplify management at scale: Cisco Networking APIs Cisco Networking App Marketplace	Hybrid Work, IoT, AI, and Distributed Data—these elements are driving network complexity, leading to fragmented solutions and limited IT visibility. Learn how Cisco's APIs and ecosystem partnerships help simplify management, enhance performance, and enable scalable, unified network infrastructures—helping businesses adapt quickly and efficiently. For IT teams seeking comprehensive visibility and agility in managing their digital infrastructure, Cisco's APIs and ecosystem offer a transformative solution.	Cisco Networking APIs, Cisco Networking Marketplace
FPW-21	Say "hello" to AI-led service: Webex AI Agent Autonomous voice	AI agents are reshaping customer experience by moving from scripted automation to intelligent, self-directed interactions. By handling routine and complex conversations end to end, Webex AI Agent enables faster resolution, more consistent service, and continuous insight—while freeing human agents to focus on higher-value customer needs and improving overall customer experience performance.	Webex AI Agent
FPW-22	Boost workforce engagement: Webex AI Quality Management Workforce Management	Get smarter insights and proactive guidance to elevate customer experiences and team performance with new Native WFM and AI Quality Management for Webex Contact Center. Give agents real-time insights and suggestions to better serve customers, while providing supervisors with a tool that automatically	Webex AI Quality Management, Webex Contact Center

		scores interactions and delivers real-time visibility across both human and AI agents.	
FPW-23	Ignite intelligent interactions: Proactive outreach AI agents Multi-modal	Webex Customer Experience Solutions is committed to delivering truly connected customer journeys - from proactive engagements to AI self-service to empowered human agents. Our vision is to seamlessly connect these touchpoints, business systems, and communication channels to deliver personalized, intelligent journeys.	Webex Contact Center, CPaaS
FPW-24	Modernize customer experience: Webex Contact Center AI Assistant On-Prem	Get smarter insights and proactive guidance to elevate customer experiences and team performance with the Cisco AI Assistant and new AI Quality Management for Webex Contact Center. Give agents real-time insights and suggestions to better serve customers, while providing supervisors with a tool that automatically scores interactions and delivers real-time visibility across both human and AI agents.	Webex Contact Center, Cisco AI Assistant
FPW-26	Cisco Cafe: Webex Customer Experience Solutions	Automate and orchestrate richer customer journeys. Explore digital engagement use cases like appointment scheduling and call deflection and see our latest AI-powered innovations — including the ability to generate code in Webex Connect’s flow builder from simple natural language descriptions.	Webex Connect
FPW-27	Transform branch experiences: Secure routers Presence analytics Wireless Assurance	Exceptional customer experience depends on secure, assured, and highly available connectivity. See how Cisco networking and security solutions work together in harmony to accelerate your growth and differentiate your customer experiences.	MV63, Cisco Secure Router 8100, Cisco Secure Router 8200, CW9172I AP
FPW-28	Create smarter, safer spaces: Physical security Video analytics	Revolutionize your physical security and remote branch monitoring with AI-powered, cloud-managed smart cameras for enhanced security and data-driven insights. Get a peek inside a retail branch and see how you can pair these devices with a cloud-managed network to protect what matters - people, spaces, and your critical infrastructure.	MV63, MV93, MV23, MV73
FPW-29	Secure sites, users, and apps: Secure routers SASE Zero trust	The Unified Branch real-time demo highlights the centralization of on-prem Cisco Secure Router management using an all-in-one cloud dashboard. It streamlines security by allowing unified policy settings, eliminating the need for separate security policy configurations. The Security Control Center facilitates effortless deployment of configuration and security policies to Cisco Secure Routers.	Cisco 8000 Series Secure Routers, Cisco Secure Cloud Control

FPW-30	Manage and secure AI traffic: Cisco Secure Access Cisco SD-WAN	Discover how Cisco SASE enables organizations to embrace AI for their workforce. AI traffic puts demand on WAN networks for high performance, low latency connections to remote processing. AI traffic needs to be identified and prioritized to ensure this new type of traffic is delivered to meet business needs.	Cisco Secure Access, Cisco SD-WAN
FPW-31	Secure agentic AI: Cisco Secure Access	Explore how Agentic AI is reshaping enterprise security. Learn how Cisco is powering new visibility, identity, and access controls to safely enable autonomous AI systems built for zero trust security.	Cisco Firewall, Cisco Duo, Cisco Secure Access
FPW-32	Outsmart identity attacks: Cisco Duo Cisco Identity Intelligence	Identity is the new security perimeter and foundation of Zero Trust yet remains the cause of most breaches. Come learn how Cisco's security-first IAM solution fortifies against identity-based attacks with end-to-end phishing resistance and simultaneously enriches the security portfolio using Cisco Identity Intelligence risk insights to deliver continuous identity visibility, security, and dynamic access policies.	Cisco Duo, Cisco Identity Intelligence
FPW-33	Secure access to GenAI apps: Cisco Secure Access	Learn how to implement safe and secure access to GenAI apps with our automated guardrails policy engine. Also, with the newly launched AI Supply Chain Risk Management capability, learn how we can allow for safe development of AI applications.	Cisco Secure Access
FPW-34	Turn buildings into smart spaces: Cisco Spaces	Come learn how to transform your building into a Smart Space using the Smart Spaces Stack—powered by Cisco Wireless, Collaboration, and Spaces. By leveraging Cisco infrastructure and Spaces' AI-powered maps, you can seamlessly deliver outcomes such as indoor navigation, asset tracking, occupancy insights, guest onboarding, and device management.	Cisco Spaces
FPW-35	Turn buildings into smart spaces: Cisco Spaces	Come learn how to transform your building into a Smart Space using the Smart Spaces Stack—powered by Cisco Wireless, Collaboration, and Spaces. By leveraging Cisco infrastructure and Spaces' AI-powered maps, you can seamlessly deliver outcomes such as indoor navigation, asset tracking, occupancy insights, guest onboarding, and device management.	Cisco Spaces

FPW-36	Connected building technology: Networking Collaboration Splunk	Step into a fully automated, data driven smart space where Cisco's PoE, switching, collaboration tools, sensors, cameras, and third-party devices unite. See how Splunk analytics delivers actionable insights and trends, driving automation, efficiency, and intelligent decision-making across your building ecosystem.	Cisco MV Camera, Cisco Access Point, Cisco MT15 Splunk Edge Hub, Cisco MT30, Cisco MT40, Panduit FMP Receiver, Cisco 9300 Switch, Cisco Room Vision PTZ, Cisco Room Bar, Cisco 9800 Phone, Cisco Room Navigator for Table, Cisco Room Navigator for Wall, Cisco MX68, Cisco MT20, MHT Lighting Inspector Node, MHT Lighting Switch, MHT Light Sensor, Somfy Blind, Thinlabs 27-inch PoE Monitor, Thinlabs 43-inch PoE Digital Signage
FPW-37	Powering the campus and workplace: End-to-end touch-safe power	Energy Networking: Fault Managed Power (FMP) + PoE for Future-Proofed Workplaces. Explore a smart building infrastructure featuring collaboration devices, switches, PoE lighting, and sensors. See how integrated technologies enhance collaboration, optimize energy use, and provide real-time insights into occupancy and environmental conditions, creating smarter, sustainable, and more efficient workplaces.	Cisco Catalyst Switch, 380v AC Receiver, Panduit 48v Receiver, Panduit Transmitter, Panduit Spool, Thinlabs Monitor
FPW-38	Services for workplaces: SD-WAN SASE Unified branch	Cisco Services helps modernize your workplace with expert led AI-powered design, automation, and support across SD-WAN, Universal Zero Trust Network Access (ZTNA), and branch refresh initiatives. Accelerate deployment, reduce risk, and maximize value with infrastructure as code and intelligent asset management.	SD-WAN, Universal Zero Trust Network Access (ZTNA), SASE
FPW-39	Services for workplaces: Cisco Spaces Wi-Fi 7 Webex	Cisco Services helps modernize your workplace with expert led AI-powered design, automation, and support across Cisco Spaces, secure access, and collaboration. Accelerate deployment, reduce risk, and maximize value with AI-powered automation for collaboration migrations, assessments, and testing.	Cisco Spaces, Webex
FPW-40	Increase factory uptime: AI-powered monitoring and issue resolution	Come, experience the future. See what you can accomplish with a high-performance, resilient, secure, and deterministic industrial network. Virtualize your factory floor? Check. Maintain consistent product quality with high-res imaging and AI powered analysis? Check. Maximize uptime with AI-based rapid network troubleshooting? Check. All on a fully functional factory right here in the World of Solutions!	IEs, SEA, CV, Splunk Unified Edge, AI Agent for Industrial Networks
FPW-41	Power smart transportation:	Cisco delivers secure, reliable connectivity to roadways and railways, enabling smart transportation systems, real-time data	SD-WAN, IR1101, Cisco Catalyst Center, IE3500, Meraki Camera MV93X

	Roadways Intersections Rail	sharing, and enhanced safety. Our solutions power connected roadways, intersections, and rail infrastructure, ensuring seamless communication and protection across critical transportation networks.	
FPW-42	Redefine Industrial Operations: Real-time adaptive AI for manufacturing	Experience AI-driven guitar tuning in a manufacturing demo that showcases the power of Cisco Security and industrial networking. See how intelligent automation and secure connectivity optimize precision, performance, and protection in real-time production environments.	IE-3500-8U3X, IE-3500-8t3s, Cyber Vision, Splunk, Secure Equipment Access
FPW-43	Extend your network further, faster: Cisco Wireless with URWB	Ultra-Reliable Wireless Backhaul (URWB) delivers near-zero latency and seamless roaming for applications demanding greater reliability than Wi-Fi alone can provide. Cisco Wireless with URWB lets you run both technologies simultaneously from a single access point, simplifying operations with unified, single-pane-of-glass management.	IW9165E, IW9167, CW9176I, Wireless Controller
FPW-44	Build resilient power grids: Substations Distribution Renewables	Cisco delivers secure, reliable connectivity to utility grids, enabling real-time data, remote monitoring, and resilient operations. These solutions (Substation, Distribution, and Renewables) ensure cybersecurity, optimize performance, and support smart grid transformation for modern energy infrastructure.	IR1101, IR8340, IE9300, P-5GS6-R16S-GL, P-LTEA7-EAL, P-LTE-450, P-LTE-GB, Field Network Director, SD-WAN
FPW-45	Scale OT cybersecurity: Visibility Segmentation Remote access Splunk	Learn how Cisco can help you manage cyber risks for your industrial operations. See how Cisco Cyber Vision can get comprehensive visibility into OT assets, vulnerabilities, and activities to help IT and OT work together to improve your security posture and implement best practices. Discover Cyber Vision's SEA for secure zero-trust remote access to OT assets. In this demo, you will also experience the future of industrial cybersecurity as we unveil Cisco Cyber Vision Site Manager (CVSM) to orchestrate multi-site OT security projects. See how the Cyber Vision app on Splunk core can help you build advanced dashboards to monitor your global industrial resilience.	Cyber Vision, IE3400, SEA, Splunk
FPW-46	Industrial product portfolio	Experience industry-leading solutions to simplify and scale IT for industrial networks. Rely on tougher, smarter IT solutions that bring IT and OT together, enhance efficiencies, and pave the way for AI-ready industrial operations.	IE-3500-8U3X, IE-3500-8t3s, IE-3500H-12P2MU2X, IE-3500H-12FT4T, IE-3500H-16T, IE-3505-8p3s, IE-3100H-6FT2T-E, IE-3100H-8T-E, IE-3100-3P1U2S-E 4PPoE, IE-3100-6P2U2C-E, IE9300, IEM-4MU,

			IEM-16p, IEM-6t2s, IEM-8t, Cisco Catalyst IE3100 Rugged, Cisco Catalyst IE3105 Rugged, Cisco Catalyst IE3300-8T2S, Cisco Catalyst IE3400-8T2S, Cisco Catalyst IE9300, Cisco Catalyst IW9165D Rugged Access Point and Wireless Client, Cisco Catalyst IW9165E Rugged Access Point and Wireless Client, Cisco Catalyst IW9167E, PWR IE65W PC-AC, PWR-IE50W-AC-IEC=, PWR-IE50 W-AC-L=, PWR IE480W-PCAC-L=, PWR IE240W-PCAC-L=, Cisco Catalyst IR1101, Cisco Catalyst IR1800, Cisco Catalyst IR8340, P-LTEAP-GL, P-LTE-450, P-LTE-EA, P-LTE-MNA
FPW-47	Extend your IT networks anywhere: Rugged switches Cameras Meraki dashboard	Cisco Rugged IE Switches on the Meraki dashboard deliver effortless management for both enterprise and harsh environments. Leverage the dashboard's intuitive cloud platform to easily control PoE devices in extreme conditions—whether cold, hot, humid, or harsh—ensuring a resilient, high-performance network that stands up to any environment.	IE3500, Cisco Meraki dashboard, MV84X, MV73X, MV93X
FPW-48	Future-ready industrial infrastructure: Industrial switching Industrial routing Wi-Fi and URWB OT security	Industry-leading solutions to simplify and scale IT for industrial networks. Rely on tougher, smarter IT solutions that bring IT and OT together, enhance efficiencies, and pave the way for AI-ready industrial operations.	

Cisco Showcase > Secure Global Connectivity

Service providers have an opportunity to capitalize on the rapidly evolving AI opportunity by providing the key players in the ecosystem with secure global connectivity that helps to unlock AI's full potential. Cisco can help—with a robust, flexible platform designed to maximize digital resilience and revenue generation.

LOCATION	DEMO NAME	DESCRIPTION	PRODUCTS AND SERVICES
SGC-01	Accelerate autonomous networking: Cisco Crosswork Network Automation	Experience the future of network troubleshooting with Cisco Crosswork Network Automation, powered by a cutting-edge, multi-agentic framework. Purpose-built AI agents accelerate your journey toward autonomous networking. Witness firsthand how agentic AI enables engineers to diagnose, and resolve complex, multi-vendor network issues with greater speed, accuracy, and confidence.	Cisco Crosswork Network Controller, Cisco Provider Connectivity Assurance, Cisco AI Canvas

SGC-02	Drive network performance: Cisco Provider Connectivity Assurance	The demo will showcase new Integrated Performance Measurement that combines synthetic network testing integrated in the Cisco Silicon One platform with Assurance AIOps for unparalleled visibility into IP network performance. Get AI-powered actionable insights into your critical network infrastructure and how users are impacted to enable autonomous network optimization.	Cisco Provider Connectivity Assurance, Integrated Performance Measurement (IPM) IOSXR, SRV6, PCA User Experience
SGC-03	Scale connectivity for AI: Cisco Routed Optical Networking	This demo showcases how to efficiently scale your network and services for AI connectivity by converging IP and optical infrastructure with Cisco Routed Optical Networking. See how to transform network economics, simplify operations, and assure robust connectivity for data center interconnect, campus and metro, regional and ultra-long haul use cases.	Cisco Routed Optical Networking, Cisco Provider Connectivity Assurance
SGC-04	Unleash seamless connectivity: SRv6 and non-terrestrial networks	Experience Cisco Crosswork Network Controller in action, automating network lifecycles. See real-time analytics, AI-driven planning, congestion mitigation, and seamless SRv6 migration—plus automated resource deployment and network growth insights. Alternatively, discover how Cisco’s satellite networking enables seamless, secure, AI-ready connectivity.	Cisco Crosswork Network Controller, Non-Terrestrial (Satellite) Networking
SGC-05	Simplify, automate, and succeed: Cisco Agile Services Networking customer success stories	This demo will show customer success videos.	Cisco Agile Services Networking
SGC-06	Enable WAN connectivity for AI: Cisco Agile Services Networking for AI interconnect	Cisco Agile Services Networking enables you to simplify your WAN and deliver the network transport SLAs for agentic AI connectivity. Discover the role of WAN connectivity for use cases across industries ensuring secure, high bandwidth and low latency connections for AI training, tuning, inferencing, and agentic interactions.	Cisco Agile Services Networking

SGC-07	Optimize infrastructure ops: Services for Cisco Agile Services Networking	Cisco Services helps you build, modernize, and optimize Agile Services Networks to meet demanding traffic engineering and segment routing needs. Harness the power of AI to simplify operations and maintain service continuity by identifying gaps, validating configurations, and supporting rollback in your migration to scalable and secure SRv6 networks.	Cisco Services
CSGC-08	Protect critical infrastructure: Cisco Service Provider Security	Explore Cisco Agile Services Networking's innovative security features designed to meet the dynamic demands of AI-driven service providers. See firsthand how our secure, autonomous network protects critical infrastructure from silicon to service while unlocking new revenue opportunities.	Trust in Infrastructure, Cisco Secure DDoS Edge Protection, Post-Quantum Security
SGC-09	Launch new services faster: Cisco Mobility Services Platform	Unlock new revenue opportunities with Cisco Mobility Services Platform, purpose-built to help Communications Service Providers and Enterprises rapidly launch new consumer, enterprise, and IoT services. Simplify operations and drive innovation with a cloud-native mobile core, available on-premises, or as-a-service. In this demo, we'll showcase how you can seamlessly add 5G alongside existing networks, protect current investments, and unlock new monetization models. Discover how our adaptable, scalable architecture enables faster service creation, effortless integration, and measurable business growth.	Cisco Mobility Services Platform

SGC-10	<p>Simplify network architecture: Deploy Cisco Agile Services Networking Embrace Cisco Routed Optical Networking Power networks with Cisco Silicon One Unleash AI-native infrastructure</p>	<p>Check out innovations in silicon, optics, routing, AI, and assurance, all designed to help change the economics of your network. Plus, learn how Cisco can help you deliver a simplified network architecture optimized for flexible service deployment, built for resilient experiences, and ready to monetize.</p>	<p>Assurance Module, ENC-10G-ONT-10, ENC-10G-ONT-14A, ENC-10G-ONT-01PR, Cisco 8011-4G24Y4H-I, Cisco 8011-32Y8L2H2FH, NCS 540, Pluggable OLT (EML), Pluggable OLT (DML), Assurance SFP, Cisco 8711-32FH-M, Cisco 8711-48Z-M, Cisco 8712-MOD-M, Cisco 8404, Cisco 88-LC1-12TH24FH-E, Cisco 88-LC1-52Y8H-EM, Cisco 8122x-64EF-O, NCS 1014, CIM8 – pluggable optic, Cisco 8212-48FH-M, Cisco NCS 1010, 2.4T Line Card for NCS 1014, Cisco ONS QDD OLS, Cisco ONS-BRK-CS-8LC, Cisco Silicon One A100, Cisco Silicon One K100, Cisco Silicon One E100, Cisco Silicon One P200, Cisco Silicon One G200, Cisco 8608, Cisco 8202-32FH-M, ASR 9903, NCS 57C3, Cisco 8201-32FH, Cisco 8223-64E-M, Cisco 88-LC2-36EF-M, QSFP-DD 800G ZR/ZR+, OSFP 800G ZR/ZR+, QSFP-DD 2x400G FR4, QSFP-DD 8x100G FR, OSFP 800G DR8, OSFP 2x400G FR4, OSFP 800G LPO, Cisco QSFP28 100G ZR, Cisco QSFP-DD 400G ZR+ High Tx Power, Cisco QSFP-DD 400G ZR/ZR+, Cisco QSFP-DD 400G ULH, Cisco QSFP-DD 800G ZR/ZR+, Cisco OSFP 800G ZR/ZR+, Cisco 8122-64EH-O - Fixed Box, Cisco 88-LC1-36EH - Line Card, Cisco Silicon One P200, Cisco Silicon One G200, Cisco 88-LC1-48Y8H-EM</p>
