

# DevNet

## Infrastructure-as-Code

The concepts of infrastructure and code can seem diametrically opposed, yet the fundamentals come from a route of repeatability and simplification. In this session, you will learn developer concepts for how you can automate the “sweaty armpit work” in your network.

START

June 13 | 1:00 p.m.

### DE VWKS-1759

NetDevOps for Network Peeps: How to get started with APIs and Ansible

June 13 | 9:00 a.m.

### DE VWKS-1235

Getting Started with IaC and Terraform

June 14 | 12:00 p.m.

### DEVNET-2090

Event Driven Infrastructure with Intersight Kubernetes Service and TriggerMesh

June 16 | 9:00 a.m.

### DE VWKS-1439

Automation gone wrong - Lessons learned from screwing up your network automation

FINISH

June 13 | 3:00 p.m.

### DE VWKS-1950

Saturday Night and the Network's Alright - Network Automation Hacks to Keep Your Weekends Free!

If you are unable to attend a live session, you can watch it On Demand after the event.

CISCO *Live!*
