

The background is a vibrant, abstract graphic. It features a central bright white light source from which numerous colorful rays emanate, creating a sunburst or starburst effect. The rays transition through a spectrum of colors including yellow, orange, red, and various shades of blue and green. Overlaid on this are several large, semi-transparent, wavy shapes in similar color tones, giving the overall image a sense of motion and energy.

The bridge to possible

How Carrier Neutral Facilities (CNF) are Transforming Enterprises to Digitally Converged Architecture

Dhrumil Prajapati
Sr. Delivery Architect
BRKNWT-2201

Cisco Webex App

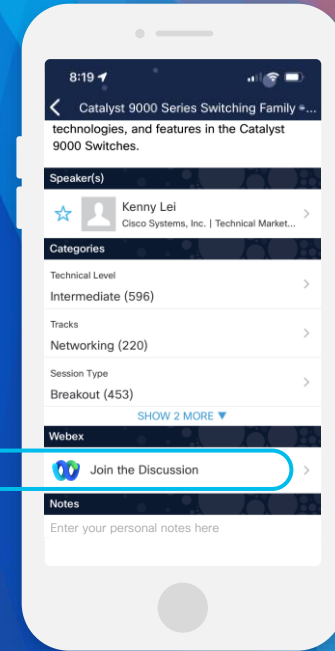

Questions?

Use Cisco Webex App to chat with the speaker after the session

How

- 1 Find this session in the Cisco Live Mobile App
- 2 Click “Join the Discussion”
- 3 Install the Webex App or go directly to the Webex space
- 4 Enter messages/questions in the Webex space

Webex spaces will be moderated by the speaker until June 9, 2023.

“CNF means Carrier Neutral Facility”

Very Important

Who am I?

Dhrumil Prajapati

Sr. Delivery Architect

Technology and Transformation Group – CX

8+ Years @ Cisco

CCIE #28071 (R/S, SP)

CCDE #20210002

Specialized in: SD-Access, SD-WAN, MPLS,
Multi-Domain Networks, Cloud, Automation

@DhruPrajapati

Agenda

- Introduction
- What is CNF and why it is cost effective?
- CNF design considerations
- Actual deployment example
- Conclusion

Introduction

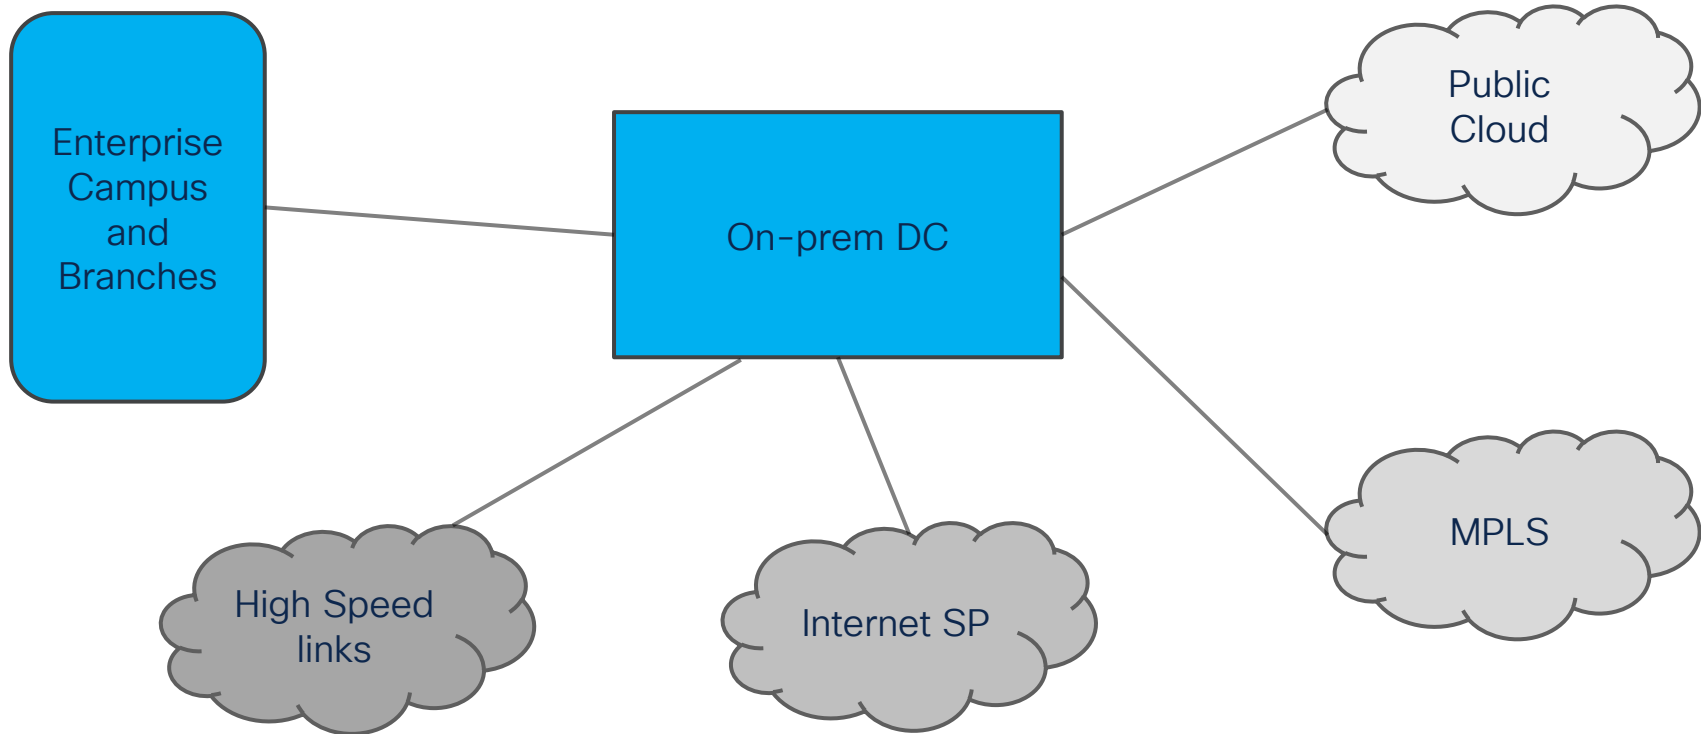

Enterprise have been moving to cloud but still they want some services with them.

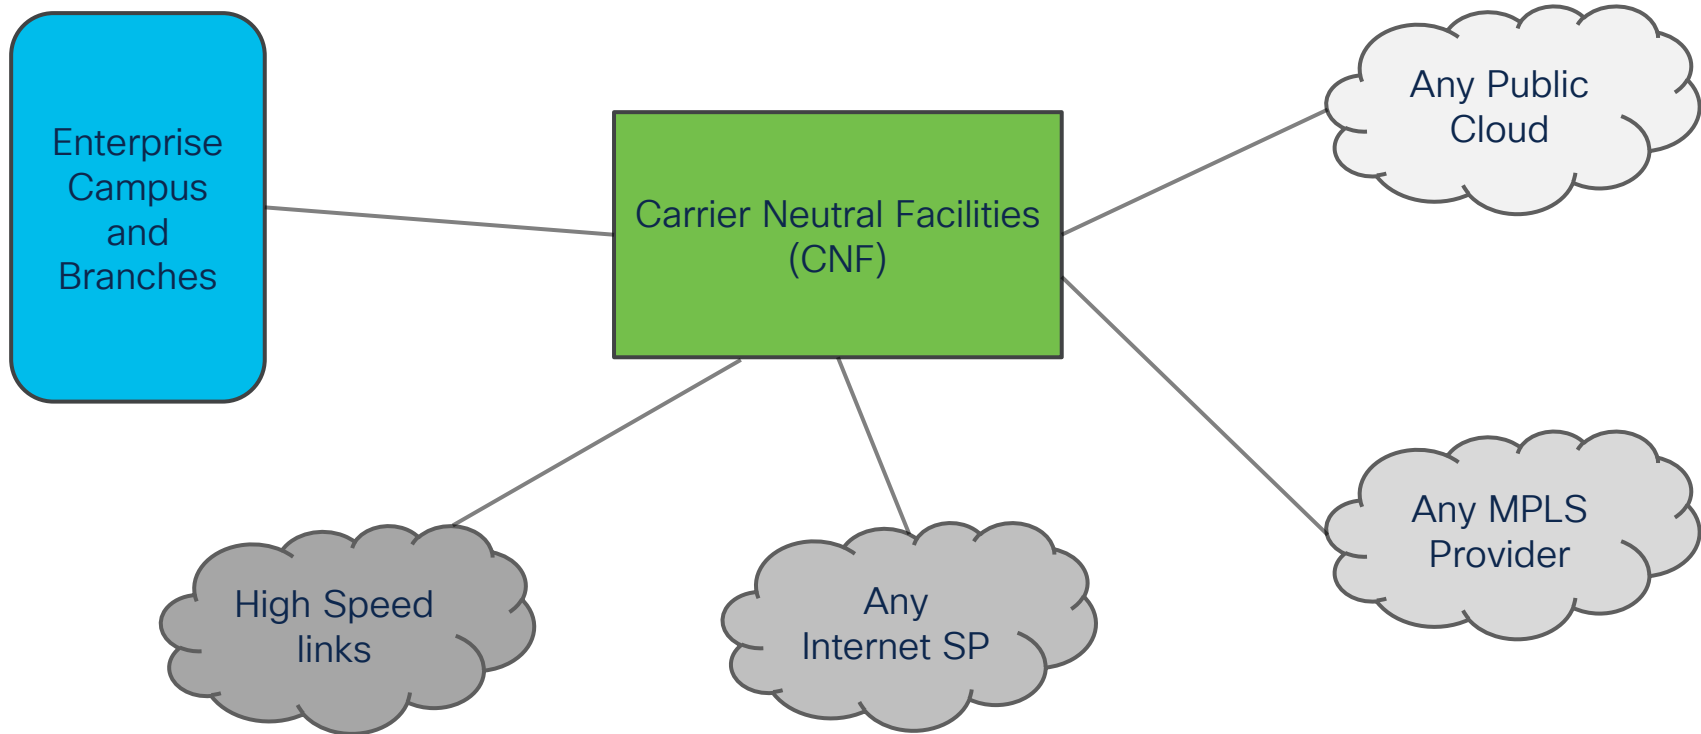

1. 60% have been moved to cloud and out of these 60%, 40% percent are considering multi-cloud.
2. There is a need to connect private cloud with enterprise network
3. Management and maintenance of an on-prem datacenter for some services requires operational cost
4. CNF is the solution.

What is CNF and
why it is cost
effective?

On-prem Datacenter and Operational Cost

CNF's and why they are cost effective

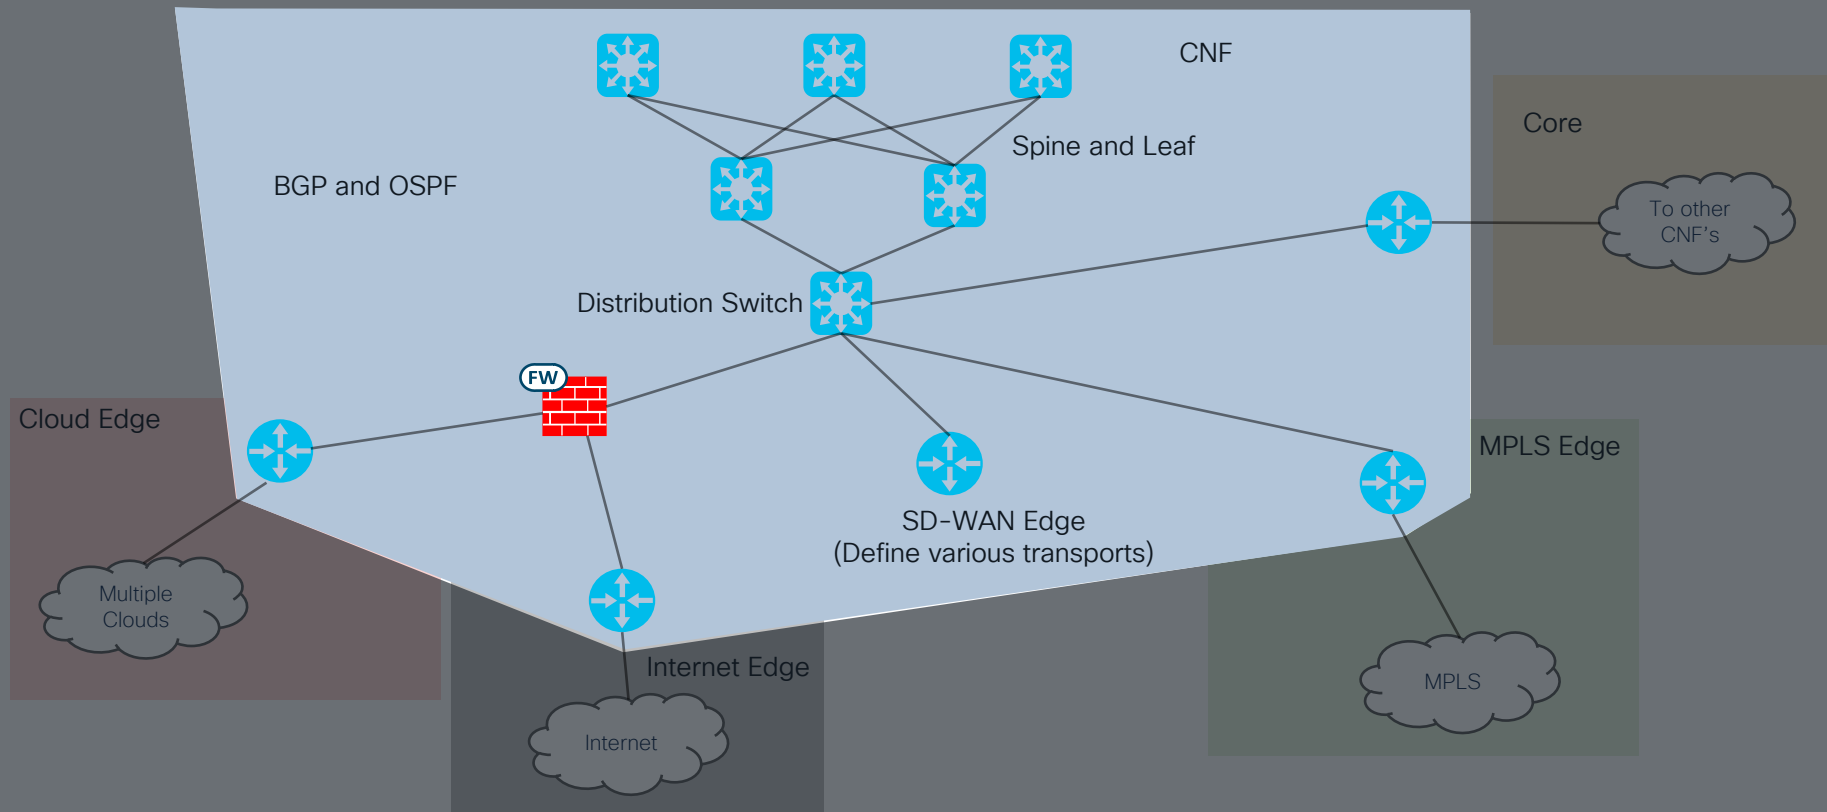

CNF Design Considerations

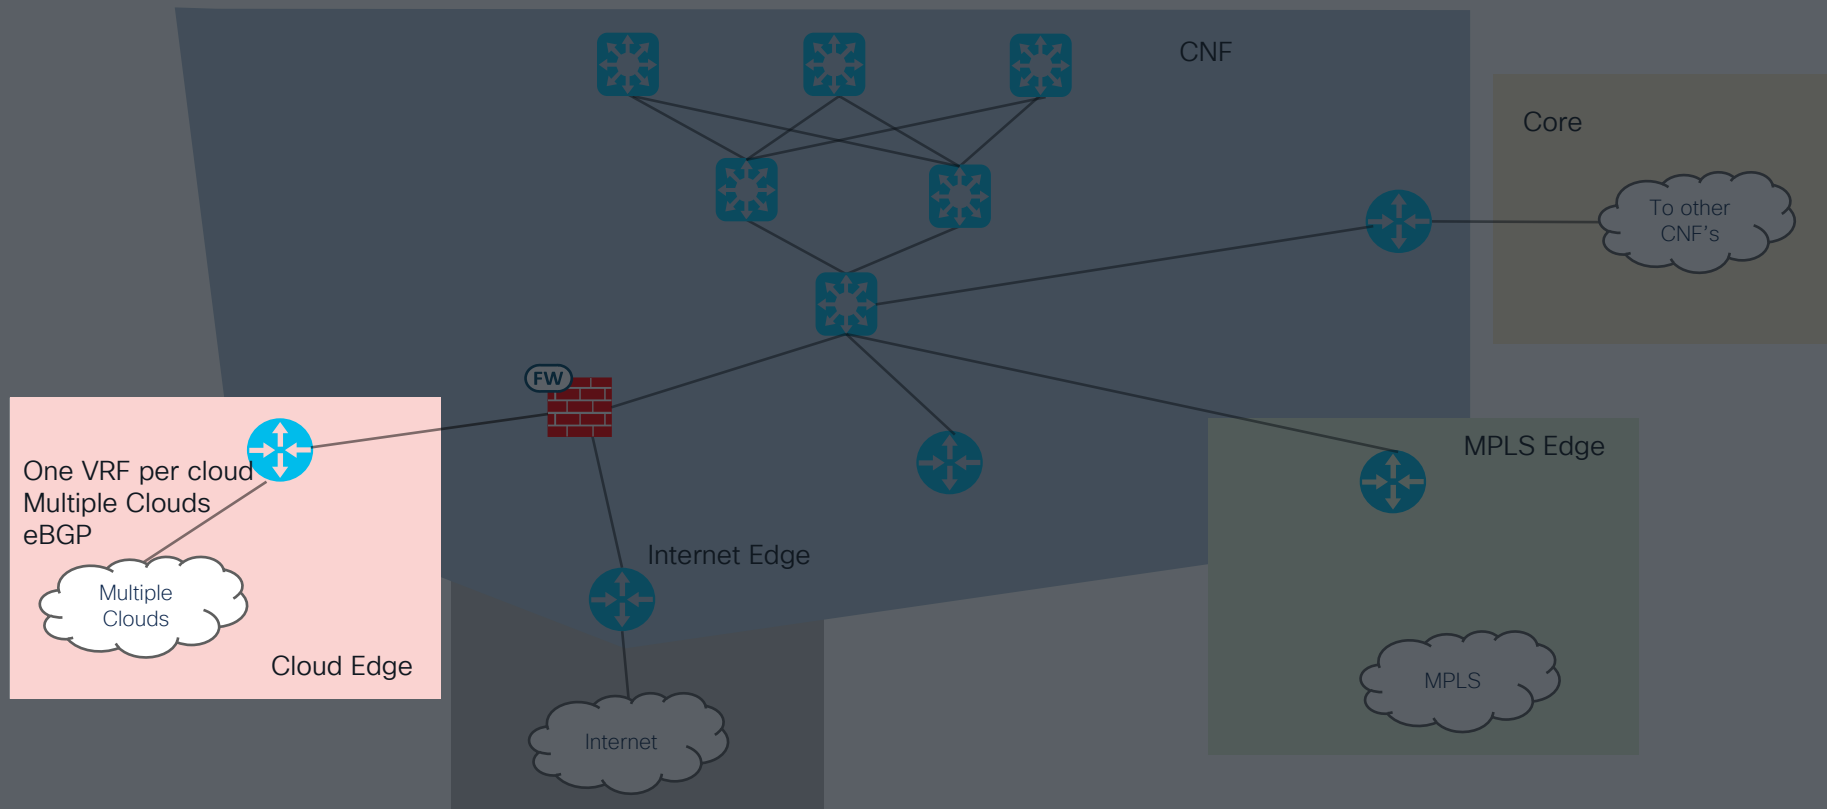

CNF Overall Design

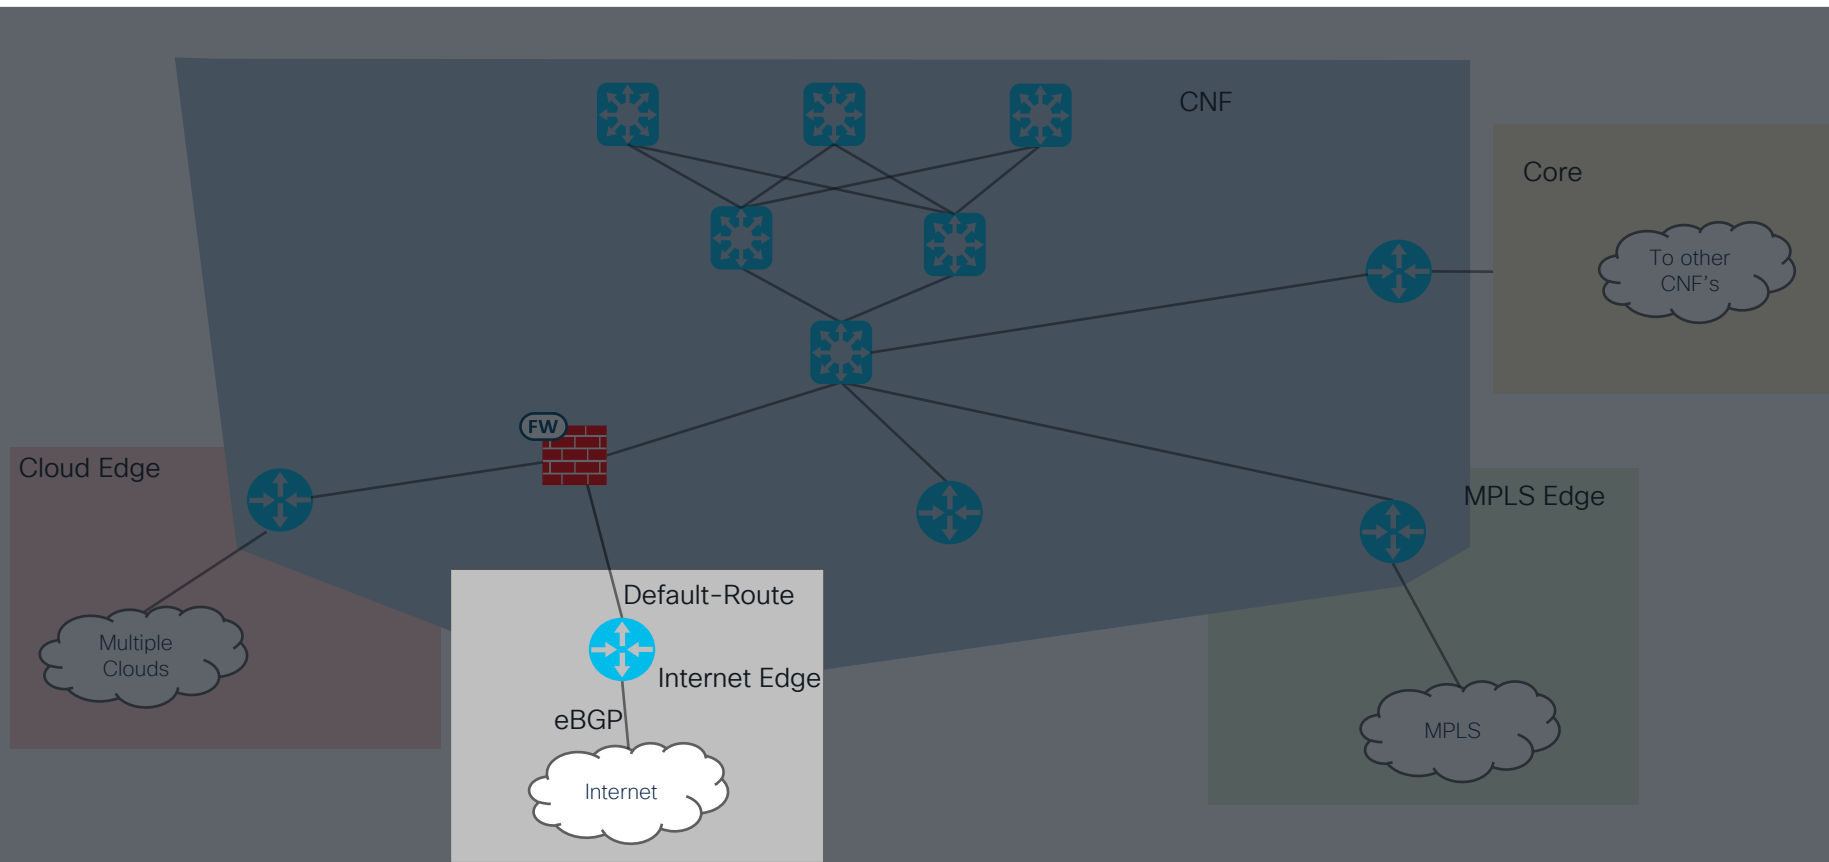

CNF Routing

Cloud Edge

Internet Edge

MPLS Edge

CNF Core

Actual CNF Deployment example

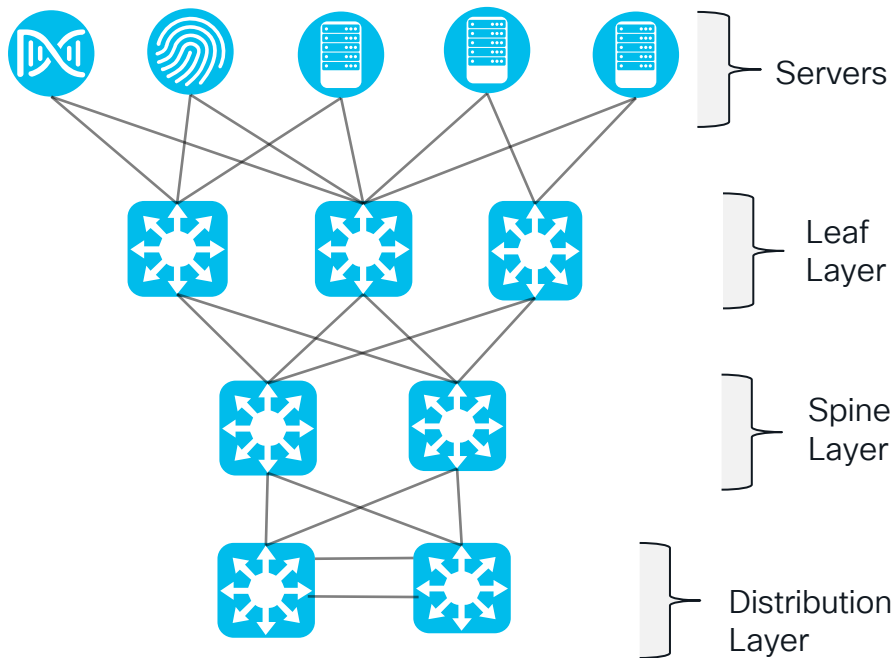

CNF Overall Design

Real-world CNF analysis

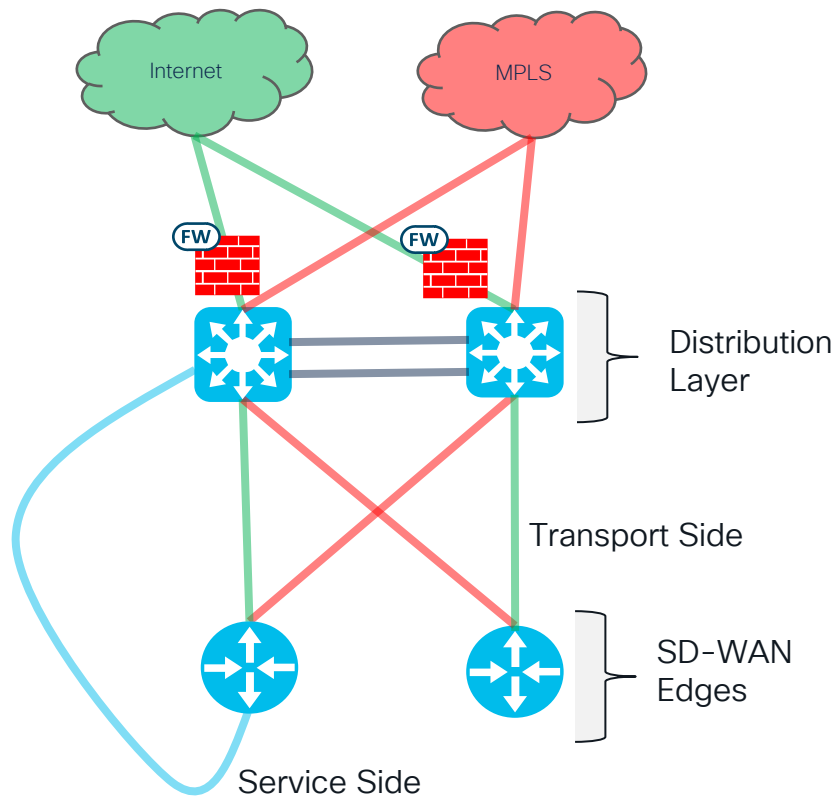

CNF Core Network

- Leaf and Spine topology
- Application, Servers, AAA and other services are connected to leaf.
- SVI of VLAN's are on the spines
- Distribution layer for efficient routing between different edges
- Routing (OSPF and BGP)

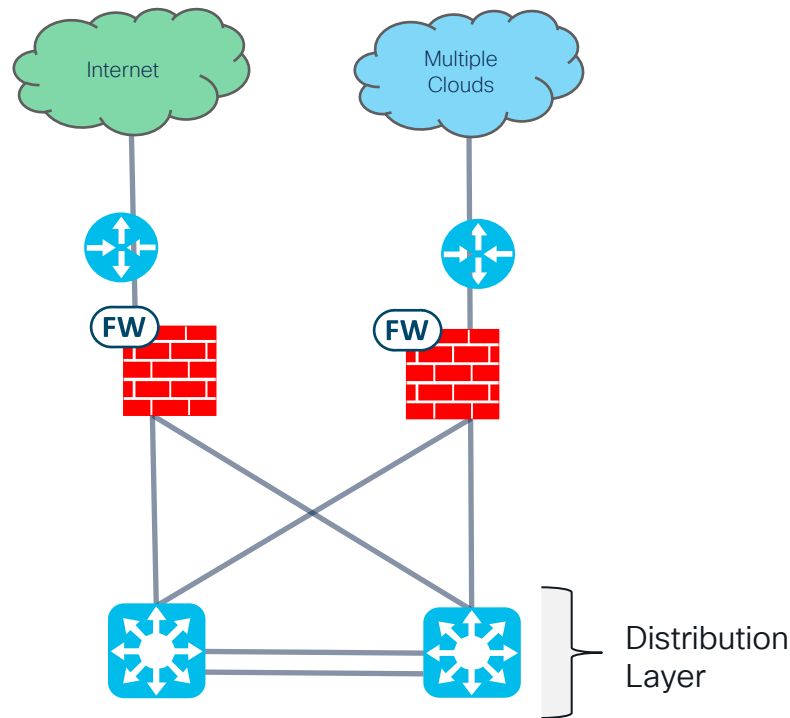

CNF SD-WAN edge devices

- SD-WAN Edges are directly connected to distribution layer.
- Various Transports (Public and Private)
- Service side is connected to WAN distributions
- SD-WAN VPN's are the key
- Routing (OSPF and BGP)

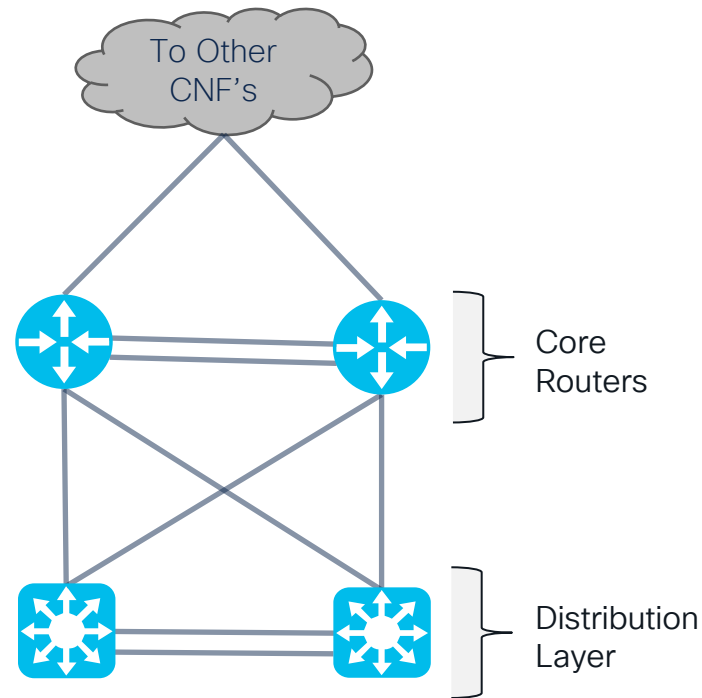

CNF Firewall Considerations

- Active/Standby firewall design
- Traffic to and from Cloud and Internet pass through firewall.
- FW's are directly connected to distribution switches
- Firewall is receiving default route from internet and advertising it towards distribution switches.
- Routing (OSPF and BGP)

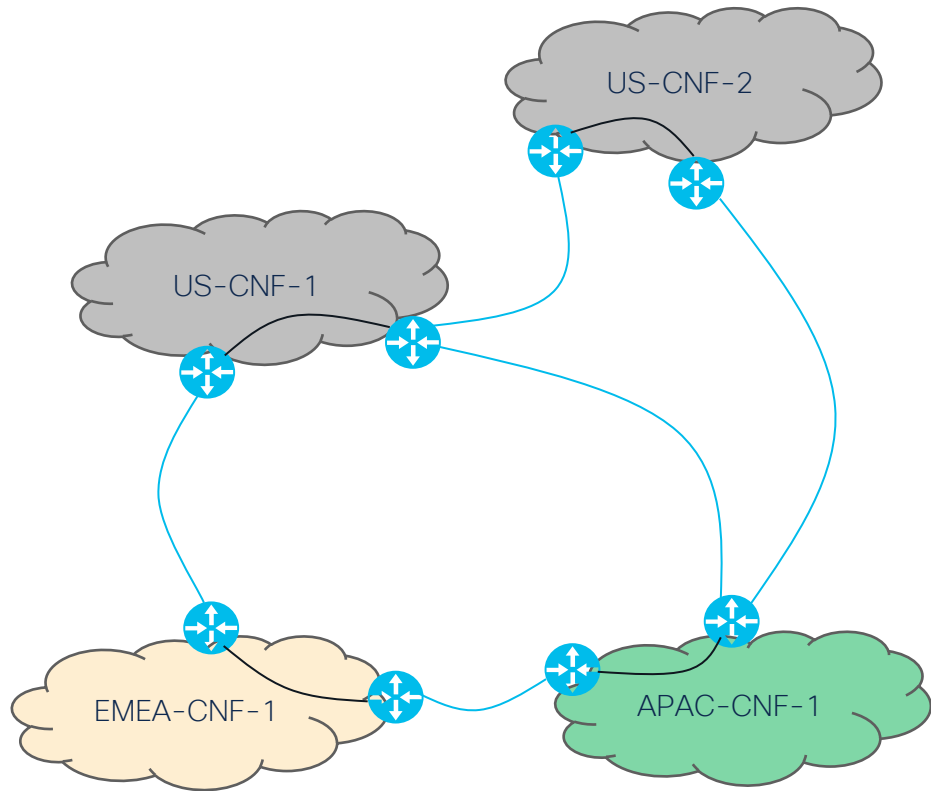

CNF Core Design (to other CNF)

- Core routers are connected to distribution switches
- Advertising only the relevant route
- Firewall is receiving default route from internet and advertising it towards distribution switches.
- Routing (OSPF and BGP)

CNF Interconnection

- Connected over private 10Gig links
- eBGP is running to exchange routes. Controlling and filtering routes based on BGP communities.
- Each CNF has its own MPLS, Internet and Cloud Edge

Various CNF Edges

Fill out your session surveys!

Attendees who fill out a minimum of four session surveys and the overall event survey will get **Cisco Live-branded socks** (while supplies last)!

Attendees will also earn 100 points in the **Cisco Live Game** for every survey completed.

These points help you get on the leaderboard and increase your chances of winning daily and grand prizes

Continue your education

- Visit the Cisco Showcase for related demos
- Book your one-on-one Meet the Engineer meeting
- Attend the interactive education with DevNet, Capture the Flag, and Walk-in Labs
- Visit the On-Demand Library for more sessions at www.CiscoLive.com/on-demand

The bridge to possible

Thank you

Cisco Live Challenge

Gamify your Cisco Live experience!
Get points for attending this session!

How:

- 1 Open the Cisco Events App.
- 2 Click on 'Cisco Live Challenge' in the side menu.
- 3 Click on View Your Badges at the top.
- 4 Click the + at the bottom of the screen and scan the QR code:
